

# **Government subsidy for container pv kit in Saudi Arabia**

## Overview

---

Under the new scheme, named for the Arabic word for renewables Mutjadedda, component manufacturers can borrow up to 75% of a project's cost from the government and benefit from loan repayment periods of up to 20 years and grace periods of up to 36 months. Do distributed PV systems work in Saudi Arabia?

This study has provided valuable insights into the utilisation, potential, and challenges of distributed PV systems in Saudi Arabia, offering findings that are applicable to many MENA countries with similar climate conditions. By analysing UF, PR, energy savings, electricity rates, and economic viability, several key conclusions have emerged.

What is PIF & how can it help Saudi Arabia?

With utilities and renewables one of PIF's 13 strategic sectors, the Fund is focused on unlocking the capabilities of promising sectors and enabling the private sector to enhance Saudi Arabia's efforts in diversifying the economy, in line with Vision 2030.

Is a PV system feasible in Riyadh?

The research findings indicate that it is feasible to establish an economical PV system in Riyadh, offering a 77 % PR and a normalised LCOE of 0.061 USD/kWh. This setup entails an ROI period of 16.8 years and involves a CAPEX of USD 3,982,655.

## Government subsidy for container pv kit in Saudi Arabia
