Italy's €9.7 billion scheme will support the construction of 17.65GW of new renewables capacity. Credit: Glyn Lowe via Flickr. The European Commission (EC) has approved a €9.7 billion (US\$10.2 billion) Italian aid scheme to spur the growth of renewables. Approved under the State aid Temporary.

Imagine upgrading your home with solar— and getting 110% of the cost covered by the government. That's not a fantasy in Italy. Since 2020, the Italy Superbonus solar scheme has made this a reality for thousands of homeowners, transforming rooftops across the country into decentralized clean energy.

The new FER 2 decree adopted by the Italy's Ministry of the Environment and Energy Security, in agreement with the Ministry of Agriculture, Food Sovereignty and Forestry, on 12 August 2024 was published on the official website of the "Ministry of the Environment and Energy Security" and entered.

Italy's energy mix is varied. Hydropower leads at 38%, followed by solar at 23%, and wind at 13% 4. The goal is to boost renewable energy to 30% of total energy by 2030 and 55% in electricity by then 4. This goal is to cut down on greenhouse gas emissions and support cleaner energy. Some key facts.

The Italian government has signed a decree to allocate EUR 320 million (USD 336.3m) in state funding to small and medium-sized enterprises (SMEs) willing to install self-consumption wind or solar power plants. Solar park in Italy.
