

Government subsidy for container solar power system in Tunisia

Overview

66,000 households are scheduled to take part in this initiative. A subsidy of 1,500 dinars will be granted for each PV installation. In addition, a subsidized loan of up to 3,000 dinars, will be granted to eligible households via their electricity bill.

66,000 households are scheduled to take part in this initiative. A subsidy of 1,500 dinars will be granted for each PV installation. In addition, a subsidized loan of up to 3,000 dinars, will be granted to eligible households via their electricity bill.

Major investments in solar power could be coming to Tunisia after the local government granted building licenses to multiple international solar companies. The North African country awarded more than \$386 million worth of licenses to solar firms from France, Norway, and Japan. The projects will be.

The ELMED interconnection project, which will link Tunisia to Italy by 2028, will play a key role in stabilizing energy supply, while supporting the energy transition in Tunisia and Europe. In addition, a network code has been drawn up to ensure the efficient integration of renewable energy.

The report acknowledges Tunisia's significant potential but notes that the country's post-COVID economic recovery continued to be moderate (real GDP grew by 2.5 percent in 2022) due to the current pace of economic reforms, resulting in regulatory barriers to growth. Additionally, the report.

Tunisia's Ministry of Industry, Mines and Energy has opened a tender that will award two solar projects with a combined capacity of 200 MW to feed electricity into the national grid. Solar panels. Image by ABO Wind (). Each of the two projects on offer will be of 100 MW in size.

Both agreements mark crucial milestones for the Tunisian renewable energy strategy, as PROSOL ELEC Economique will finance residential photovoltaic (PV) systems for 65,000 middle-income households in the whole country. The energy transition on the roofs of the Tunisian middle class is thus.

Tunisian Government Objectives for Large Scale Solar & Wind Projects. Tunisia is targeting 35% of renewable energy in its energy mix by 2035, representing circa 3,800MW. To achieve this objective the Tunisian Government is launching a series of solar and wind tenders across the country, between two.
