Government subsidy for container solar solutions in Netherlands

Overview

You can apply for the sustainable energy investment subsidy scheme (Investeringssubsidie duurzame energie, ISDE, in Dutch). This subsidy will partly compensate for the initial investment costs of the device.

You can apply for the sustainable energy investment subsidy scheme (Investeringssubsidie duurzame energie, ISDE, in Dutch). This subsidy will partly compensate for the initial investment costs of the device.

Do you want to make your business premises more sustainable, for instance by installing a solar boiler or heat pump?

You can apply for the sustainable energy investment subsidy scheme (Investeringssubsidie duurzame energie, ISDE, in Dutch). This subsidy will partly compensate for the initial.

The SDE++ subsidy (Stimulering Duurzame Energieproductie en Klimaattransitie) is a subsidy scheme of the Dutch government for companies and non-profit organisations investing in large-scale renewable energy or carbon reduction. The scheme reimburses the difference between the cost price of.

The Dutch government's Sustainable Energy Production and Climate Transition (SDE++) subsidy program is designed to financially support companies and organizations that implement renewable energy projects or technologies that reduce CO₂ emissions, such as energy storage systems. By covering the.

The Netherlands' renewable energy subsidy scheme, SDE++, a key tool in driving the energy transition, receives annual government funding to support businesses investing in sustainable projects such as solar, wind, biomass, and geothermal energy. Recent results for 2024 released by the Netherlands.

The Dutch government consistently offers a wide range of financial support programs to stimulate innovation, sustainability, and economic growth. Here's what you need to know about the key business support measures for 2025:

Good news for innovators! The WBSO scheme remains unchanged from 2024.

Then you can use the Sustainable Energy Investment Subsidy (ISDE). You are entitled to the ISDE if you invest in a heat pump, a solar boiler or wind turbines. How much subsidy you get depends on the product you buy. Sustainable transport is becoming increasingly important. From 2030, you will no.
