

# **Government subsidy for container solar solutions in Tanzania**

## Overview

---

Is solar energy a good investment in Tanzania?

Investments in solar energy in Tanzania are currently at a small scale, with about 6 MW of Photovoltaic (PV) solar energy installed. The Government supports solar development within the country by removing VAT and import taxes on the main solar components such as panels, batteries, inverters and regulators.

How does Tanzania support solar development?

Given that, the Tanzanian Government supports solar development within the country by removing VAT and import taxes on the main solar components (panels, batteries, inverters, and regulators). Solar resources in Tanzania are especially present in the central region, and they are being exploited for both off-grid and grid-connected solutions.

How much investment is needed to meet Tanzania's growing energy demand?

According to the clean energy transitionAs outlined in section 4.1.2, approximately USD 100 billion in investments is required to meet Tanzania's growing energy demand to 2050.

Can solar power improve water supply in Tanzania?

In 2019, the World Bank (WB) signed a grant agreement with the Government of Tanzania amounting to USD 4.5 million to finance the access to a sustainable water supply through improved solar pumping systems in 165 rural Tanzanian villages. In central Tanzania, 1 MWp of solar PV generates about 1,800 MWh per year and requires about 1 hectare of land.

How can GY improve supply security in Tanzania?

Energy while improving supply security. Running large-scale international auctions for procurement of wind power and solar PV would be the best way to bring

much needed private investment to boost the generation capacity in the Tanzanian power system, and a natural part of the least-cost expansion approach.

How much electricity does solar PV generate in Tanzania?

In central Tanzania, 1 MWp of solar PV generates about 1,800 MWh per year and requires about 1 hectare of land. Theoretically, solar PV could generate large shares of electricity.
