

Government subsidy for container solar solutions in Vietnam

Overview

Why has the Vietnamese government temporarily suspended solar projects?

To address the rapid growth and grid capacity issues, the Vietnamese government has temporarily suspended new approvals for large-scale solar projects. This measure aims to manage the grid's ability to integrate new capacity and transition from the FiT scheme to an auction-based system for project approval and pricing.

How much does a solar project cost in Vietnam?

Decision 13 stipulates single national FITs for solar projects nationwide, with an exception for Ninh Thuan province. In particular: For floating solar power projects: VND 1,783/kWh (equivalent to 7.69 US cents/kWh); For ground-mounted solar power projects: VND 1,644/kWh (equivalent to US 7.09 US cents/kWh); and.

How has the FIT program impacted solar power development in Vietnam?

The FiT program has been a major driver of solar power development in Vietnam, offering a tariff of 9.35 cents per kilowatt-hour (kWh) for projects completed by June 2019. This program led to a surge in solar capacity, reaching 4.46 gigawatts of new installations.

Which regions are suitable for solar energy development in Vietnam?

Regions with 1,800 or more sunshine hours annually are considered highly suitable for solar energy development. In Vietnam, this includes many areas, especially in the southern provinces. Vietnam holds great potential for biomass energy development, with an estimated total potential of 50 million tons of oil equivalent (TOE).

What challenges has Vietnam faced with anti-dumping tariffs on solar panels?

This speaks to the challenges Vietnam has faced related to anti-dumping tariffs on solar panels, particularly concerning accusations of illegal

transshipments. Some foreign companies have attempted to label Chinese-made solar products as Vietnamese to bypass higher U.S. tariffs.

What are the conditions for solar storage in Vietnam?

Conditions for systems with storage include a minimum storage capacity of 10% of the solar plant's installed capacity, a charge/discharge time of 2 hours, and at least 5% of total generation used for charging the storage system. Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FiTs were relatively low.

Government subsidy for container solar solutions in Vietnam

[Vietnam's Solar Power Industry 2025: Policy Shifts, ...](#)

Vietnam's solar power industry has grown rapidly since 2017, driven by generous feed-in tariffs and strong government support. The country now has one of the highest installed solar capacities in Southeast Asia, ...

[New Incentives for Solar Power Projects in Vietnam](#)

On April 6, 2020, the Prime Minister of Vietnam issued Decision No. 13/2020/QĐ-TTg on the mechanism for encouraging the development of solar power in Vietnam ("Decision 13"). Decision 13, which will take effect on May 22, 2020, ...
