

Government subsidy for containerized battery storage in Israel

Overview

Israel's governmental energy agency said the country plans to build four major battery energy storage system (BESS) projects in the northern Gilboa mountain region.

Israel's governmental energy agency said the country plans to build four major battery energy storage system (BESS) projects in the northern Gilboa mountain region.

Israel's governmental energy agency said the country plans to build four major battery energy storage system (BESS) projects in the northern Gilboa mountain region. The Ministry of Energy and Infrastructure on May 2 said the projects are the first step in a "program of great importance for the.

In an effort to drive the country to deploying more energy storage, the Israeli Ministry of Energy and Infrastructure has announced four large-scale battery storage projects. The government ministry - renamed from the Ministry of Energy in February to reflect a wider remit - said yesterday (2 May).

Enlight has secured a grid connection for 300 MW via two projects in Israel, which will add between 1,300 to 1,900 MWh of energy storage to the grid. Israeli renewable energy developer Enlight has won grid connection rights for 300 MW of battery storage capacity in a national tender, enabling the.

Energy Minister Eli Cohen (fourth from right) helps inaugurate the new National Institute for Energy and Electrochemical Storage at Bar-Ilan University, near Tel Aviv, June 3, 2025. (Shlomi Mizrahi, Bar-Ilan University) Sodium-based batteries for storing renewable energy cheaply and the recycling.

May 4, 2023: Planning chiefs in Israel have approved a blueprint for an 800MW/3,200MWh energy storage park comprising a variety of ESS technologies, the government announced on May 2. The energy and infrastructure ministry said the National Council for Planning and Construction had given the green.

The government has announced plans for Israel's first stand-alone energy-storage facility, consistent with the aims underpinning a revised draft climate bill (legally enshrining targets for carbon-free power generation). We expect renewables capacity to expand rapidly in 2023-27, as the government.
