Government subsidy for containerized battery storage in Italy

Overview

In early 2025, Minister Adolfo Urso greenlit a €3.2 billion subsidy package, with 30% earmarked for storage—a move that's turbocharged SME investments [2] [3]. Here's the kicker: the government isn't just throwing money at the problem.

In early 2025, Minister Adolfo Urso greenlit a €3.2 billion subsidy package, with 30% earmarked for storage—a move that's turbocharged SME investments [2] [3]. Here's the kicker: the government isn't just throwing money at the problem.

MACSE Subsidy Scheme: The new MACSE scheme offers 15-year contracts for energy storage projects and guarantees indexed linked revenue. The first auction in 2025 is expected to significantly boost BESS development. **Policy Background** The EU's energy and climate greenhouse emissions target requires EU.

Let's unpack this electrifying trend: Italy added a staggering 1.05 GW/2.63 GWh of energy storage systems in the first half of 2024 alone, marking a 24.6% year-on-year growth in installations [1] [5]. With regions like Lombardy leading at 1,454 MWh of deployed storage, the country isn't just.

The European Union (EU) Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy. The scheme totalling €17.7 billion (US\$19.5 billion) will provide annual payments covering investment and operating costs for those developing, building and.

Overseas media news on December 5, Italy's Minister of Enterprise and Manufacturing Adolfo Urso signed a new decree that will provide 320 million euros in energy subsidies to support small and medium-sized enterprises (SMEs) to invest on their own in the development and utilization of renewable.

The European Commission has approved, under EU State aid rules a €17.7 billion Italian scheme to support the construction and operation of a centralised electricity storage system. The measure contributes to the

achievement of the objectives of the European Green Deal and 'Fit for 55' package, by.

The development of Battery Energy Storage Systems (hereinafter "BESS") in Italy has been limited by the fact that the spread of renewable sources is not such as to produce significant price differences during the hours of the day yet. An unfavourable legal and regulatory framework has also.
