

# **Government subsidy for containerized microgrid in Brazil**

## Overview

---

How will a new energy grid impact Brazil?

With an upgraded grid, all Brazilians could take a more active role in electricity production, with the opportunity to become “prosumers” - producers and consumers of energy. Under the plan, hydropower plants with a capacity of 4,947 megawatts will be modernized, resulting in a reduction of greenhouse gas emissions.

How will the CNPE rules affect distributed generation systems in Brazil?

According to the CNPE, the Brazilian rules to be stipulated after the transition period, based on CNPE guidelines and Aneel's calculations, will have a positive impact on the continued growth of distributed generation systems in Brazil.

Are Brazil's new rules good for distributed generation?

When we compare the new Brazilian rules with good international practices, Brazil is well-positioned to further support its distributed-generation segment,” said the vice president of distributed generation at ABSolar, Barbara Rubim. This content is protected by copyright and may not be reused.
