

Government subsidy for containerized microgrid in Norway

Overview

"This is a comprehensive package that contributes to green job creation and the restructuring of the Norwegian economy," said Norway's Minister of Climate and Environment.

As the oil age comes to an end, there is broad acceptance across the political spectrum that Norway needs to find a new industrial base. Recently, many players have called for a significant green investment to kick-start the Norwegian economy. Amongst.

The NOK 1 billion 'green platform' is to be run as a collaboration between three state enterprises. While the Enova money is earmarked for industry projects, the green platform is designed.

Although the Solberg government has announced the package, it's by no means a done deal. That's because Solberg no longer has a majority in Norway's parliament. While it's.
