

Government subsidy for containerized renewable power in Belgium

Overview

The European Commission has announced the approval of €682m (\$756.54m) in state aid to support Belgium's renewable offshore wind energy development. The scheme was approved under the State Aid Temporary Crisis and Transition Framework, which was adopted by the Commission on 9 March 2023. How do grants and subsidies support the ecological transition in Belgium?

Grants and subsidies in Belgium support the ecological transition through regional and national programs targeting energy renovation, sustainable mobility and sustainable business practices. These schemes help reduce costs and improve energy efficiency, while contributing to the reduction of CO2 emissions.

What is a green energy subsidy & how does it work?

Specific aid is allocated for the integration of green technologies that aim to reduce CO2 emissions and improve energy efficiency. These subsidies also support investment in energy-efficient equipment, such as low-carbon production systems and innovative solutions to optimize energy consumption.

Is there a legal framework for energy communities?

In 2024, the Flemish Energy and Climate Agency (VEKA) carried out an evaluation of the existing legal framework for energy communities. The evaluation suggests a number of changes to the existing framework.
