Government subsidy for containerized renewable power in Luxembourg

Overview

How long will Luxembourg's green energy subsidies last?

Financial subsidies for homes switching to green energy systems are to be extended for a further two years, the government said on Friday. Luxembourg households seeking to upgrade to renewable and more energy-efficient sources will continue to benefit from a top-up payment covering 25% of the cost of renovation, in addition to the basic support.

How will Luxembourg benefit from the European financing mechanism?

In addition to these bilateral or multilateral initiatives, Luxembourg also intends to make full use of the European Financing Mechanism, which allows European countries to join together to develop and finance renewable energy projects, from which the money will be invested in concrete and clearly identifiable projects for Luxembourg taxpayers.

How does the NZIA support Luxembourg?

In line with the NZIA's goal of manufacturing, at least 40% of clean technology needs within the EU by 2030, investments in local infrastructure such as solar energy projects in Luxembourg are being promoted. Luxembourg participates in projects financed by the EU Innovation Fund, which supports innovative industrial initiatives.

How will decarbonisation and digitalisation affect energy supply?

Energy supply will have to be sustainable, secure and competitive in a context of decarbonisation and digitalisation. The transformation of the centralised production system towards a more decentralised system will be a key element of the energy transition.

Will subsidies be extended for solar panels & electric cars?

However, level of financial support for installing solar panels and purchase of electric cars will be reduced. Financial subsidies for homes switching to green

energy systems are to be extended for a further two years, the government said on Friday.

How much will a new electric car subsidy cost?

There will be no basic minimum level of subsidies granted, a huge change from the current set-up, whereby motorists are offered between €3,000 to €8,000. Buyers of electric cars will instead be offered support of up to €6,000 depending on the model, according to Frieden's proposals.
