Reducing greenhouse gas emissions, cooling the cities and preparing for the climate crisis: the Ministry of Environmental Protection, the Ministry of Economy and Industry, the Ministry of Energy and the Ministry of Finance are launching a new program in the amount of NIS 98 million to subsidize.

The incentive scheme awards a 23-year, \$0.12/kWh feed-in tariff to rooftop arrays with a generation capacity of up to 200 kW. Already, 141 municipalities have applied to install 116 MW of rooftop solar capacity and the government has increased the program's budget from \$28.5 million to \$143.

The government will offer tax breaks for homes, businesses, and farms that install panels and connect to the grid under the new program. Homeowners will now have access to a tax credit of up to NIS 30,000 (\$8,000) for installing panels, while businesses and farms can get up to NIS 100,000.

The incentive scheme awards a 23-year, \$0.12/ kWh feed-in tariff to roof arrays with a generation ability of approximately 200 kW. Currently, 141 municipalities have actually applied to set up 116 MW of roof solar ability and also the federal government has actually raised the program's spending.

Global trends, along with changes in the Israeli energy sector, have given rise to government resolutions to promote renewable energy in the electricity sector, and increase the percentage of electricity produced from renewable energy. By virtue of these decisions, the Ministry of Energy, in.
