

Government subsidy for containerized solar generator in Tunisia

ESS

Overview

66,000 households are scheduled to take part in this initiative. A subsidy of 1,500 dinars will be granted for each PV installation. In addition, a subsidized loan of up to 3,000 dinars, will be granted to eligible households via their electricity bill.

66,000 households are scheduled to take part in this initiative. A subsidy of 1,500 dinars will be granted for each PV installation. In addition, a subsidized loan of up to 3,000 dinars, will be granted to eligible households via their electricity bill.

The Government of Tunisia (GoT) has embarked on an ambitious path to increase its renewable energy production. The GoT plans to reach 35% of renewable energy in the electricity system capacity by 2030, against 3% currently. Renewable energy is then expected to cover 50% of the electricity needs by.

The ELMED interconnection project, which will link Tunisia to Italy by 2028, will play a key role in stabilizing energy supply, while supporting the energy transition in Tunisia and Europe. In addition, a network code has been drawn up to ensure the efficient integration of renewable energy.

Major investments in solar power could be coming to Tunisia after the local government granted building licenses to multiple international solar companies. The North African country awarded more than \$386 million worth of licenses to solar firms from France, Norway, and Japan. The projects will be.

The law relating to renewables in Tunisia (Law No 2015-12, the “ Law ”) as complemented by Decree No 2016-1123 and No 2020-105 (the “ Decrees ”), sets out the conditions and procedures for the implementation of projects for the production and sale of electricity from renewable energy sources. The.

The Tunisian Solar Plan (PST) is the national program aiming at reaching the renewable energy development strategy targets. The goal is to increase the total share of renewables in the electricity generation mix from 3% today to 30% by 2030. In order to reach these targets, Tunisia has implemented.

Both agreements mark crucial milestones for the Tunisian renewable energy strategy, as PROSOL ELEC Economique will finance residential photovoltaic (PV) systems for 65,000 middle-income households in the whole country. The energy transition on the roofs of the Tunisian middle class is thus.
