

Government subsidy for customized portable solar solution in Saudi Arabia

Overview

Why do Saudi companies use solar power?

Saudi companies that are part of multinational groups such as Ikea and GSK have deployed solar power at the encouragement of their parent companies, which have sustainability goals. Meeting such expectations has also been a factor for other Saudi groups, including logistics and transport businesses, that have links to western markets.

Is solar subsidy available on all solar systems?

The solar subsidy is not available for all solar systems. It is available for on-grid solar systems and hybrid solar systems (without batteries only). As per new policies, there is no provision of subsidies on off-grid and hybrid solar systems with batteries.

Which solar systems are eligible for subsidy in India?

The solar systems applicable for subsidy are the on-grid solar systems, hybrid solar systems, and solar water pumps. The subsidy percentage varies from state to state and the majority of states provide nearly 30% to 90% subsidy in India.

Can Chinese investments help reduce solar costs in Saudi Arabia?

Chinese investments have played a key role in lowering solar costs. Roughly one-third of \$21.6 billion in greenfield FDI from China into Saudi Arabia since 2021 has gone to clean technologies, including solar components. But the biggest shift has come from within.

Who owns Al khushaybi solar projects?

ACWA Power, a leader in the energy transition and a company in which PIF owns a stake, PIF-owned Badeel, and SAPCO, a wholly owned subsidiary of Aramco, will jointly own the solar projects – Haden, Muwayh and Al Khushaybi.
