

Government subsidy for foldable solar container in Turkey

Overview

What incentives are available for solar panels in Turkey?

The Turkish government provides comprehensive incentives for solar panel installations, including feed-in tariffs, tax exemptions, low-interest loans, and simplified licensing processes. These incentives significantly reduce the initial investment burden and encourage the transition to renewable energy. Key Takeaways:.

What is the legal framework for solar energy in Turkey?

1. Legal Framework for Solar Energy Incentives The main legislation that governs renewable energy and solar panel installations in Turkey includes: Law No. 5346 on the Utilization of Renewable Energy Sources for the Purpose of Generating Electrical Energy (YEK Law).

What are Turkey's new feed-in tariffs?

The Turkish government has issued new feed-in tariffs (FITs) for solar PV and other types of renewable energy. With Decree n. 7189, published this week in the official gazette, the Turkish authorities have set a 10-year FIT of TRY 1.06/kWh for PV systems that installed between July 1, 2021, and Dec. 31, 2030.

What is the customs tariff for solar power plants in Turkey?

No customs tariff shall be paid for imported system tools of solar energy plants. Companies operating solar power plants are not subject to the corporate income tax for 5 years. Turkey is in an advantageous area for generation of solar energy especially when compared to other European countries.

Are solar panels a good investment in Turkey?

In this context, solar panel installations have gained momentum worldwide, including in Turkey, as a means to promote clean energy production.

Governments, including Turkey's, provide various incentives, subsidies, and legal support mechanisms to encourage individuals and businesses to invest in solar energy.

Does Turkey need fair financing for solar energy systems?

In addition, the need for fair financing for household systems has been pointed out . Kural and Ara, on the other hand, analyzed Turkey's current solar energy potential and FIT application in their study and concluded that the FIT values are not at an attractive level for the investor.
