

Government subsidy for mobile foldable pv system in Egypt

Overview

How long does a PPA last in Egypt?

The period of a PPA will not exceed 25 years for solar energy projects and 20 years for wind energy projects. In 2014, the Egyptian Government launched the feed-in tariff program (" FIT Program ") to generate 4.3GW electricity from renewable energy, 2,300MW from solar and 2,000MW from wind.

What is the feed-in tariff program in Egypt?

In 2014, the Egyptian Government launched the feed-in tariff program (" FIT Program ") to generate 4.3GW electricity from renewable energy, 2,300MW from solar and 2,000MW from wind. Eligible developers are required to establish a project company in the form of a joints stock company with a minimum capital of EGP 15 million.

What are the licensing procedures for PV projects connected to the grid?

The licensing procedures for projects connected to the grid will include the following main steps: Determination of the allowed capacity: the consumer/developer will submit a request to the network operator to determine the capacity of the PV plant that can be integrated with the consumer's electricity system.

What are egyptera rules for fit companies?

According to EgyptERA Rules for FIT Companies, the major shareholder is required to maintain a minimum shareholding percentage of 25% in the project company until the lapse of 2 years after the COD. The investor is also obliged to notify EgyptERA of any amendment in the shareholders' structure of the FIT company.
