

Government subsidy for mobile pv generator in Argentina

Overview

Can PV energy be fed into the grid in Argentina?

In comparison to the global situation, the possibility to feed excess energy generated from PV systems into the grid in Argentina was only approved at national level relatively recently. Consequently, participants in this study rated interactions with distribution network operators as important.

How can a PV project be implemented in Argentina?

In Argentina, a wide range of academic options are available to qualify a workforce for implementing PV projects. State universities, where high quality education is free, play a major role. The pre-existing infrastructure of INET made it possible to establish a broad selection of technical training courses in a short period of time.

Why do we need subsidies in Argentina?

Similarly, subsidies can provide additional support to projects that align with national development goals, making investment in specific industries more appealing. By utilizing these strategies, Argentina aims to create a competitive edge that can stimulate capital inflow, enhance employment opportunities, and foster innovation.

Do decentralised photovoltaic systems contribute to the Argentinian electric mix?

By applying the TIS framework, this study found that although decentralised photovoltaic systems account for a minor share of the Argentinian electric mix, a span of market segments have emerged that are in different developmental stages due to distinct trajectories.

Is the Argentine renewable PPA market a corporate market?

This initial trend started to shift towards a corporate market through Resolution No. 281/2017 of the Argentine Ministry of Energy and Mining

(currently, Secretary of Energy), which established a set of rules for the corporate renewable PPA market (MATER).

Why do Argentinian people not know about PV systems?

Due to their low diffusion rate in Argentina, PV systems are not yet part of the population's everyday reality and, in this context, many of the interview participants remarked that there is generally a lack of knowledge regarding the application and potential of PV systems among the Argentinian population.
