

Government subsidy for mobile pv generator in Serbia

Overview

Does Serbia subsidize coal & electricity prices?

Serbia heavily subsidizes coal and electricity prices, inhibiting competition. Recently, the Serbian government and EPS have announced ambitious plans to transition to green energy solutions and reduce Serbia's dependence on Russian natural gas.

How many wind power plants does Serbia have?

Through its fully subscribed feed-in tariff program (long-term contracts which provide guaranteed pricing to renewable producers), Serbia has contracted 568 MW of wind power plants and approximately 11 MW of solar plants.

Will Serbia develop a pumped storage hydro project at Djerdap?

Serbia is interested in developing a Pumped Storage Hydro (PSH) project at Djerdap. The project is located east of Belgrade on the Danube River bordering with Romania. First conceived in 1974, Djerdap III is envisioned as a facility capable of daily and seasonal water regulation, with installed capacity of between 1800 and 2400 MW.

Will Serbia build reversible pumped-storage hydropower?

Serbia has long-standing plans to construct reversible pumped-storage hydropower capacity at the Djerdap site on the country's eastern border with Romania and the Bistrica site on the Bosnian border in the west.

Does Serbia have a potential in bioenergy?

It has great potential in bioenergy, yet capacities remain very low. In fact, Serbia exports much of its biomass throughout the region. Serbia could utilize the local biomass resources, especially for domestic heating. Efficiency measures would have to be pursued as much as possible.

Where can wind energy be found in Serbia?

The greatest potential of wind energy in Serbia is in the area of the powerful “košava” winds such as South Banat and East Serbia, as well as on the eastern side of Kopaonik Mountain, Zlatibor, Pester, and mountain passes at altitudes above 800m; as well as in the valleys of the Danube, Sava and Morava.
