

Government subsidy for mobile solar station in Luxembourg

Overview

The focus is on heat pumps, thanks to the increased grant amounts for the installation of heat pumps and eligibility for air-water heat pumps.

Subsidies for wood heating can only be granted for existing buildings. For pellet and wood log boilers, grants will now be determined according to the rated thermal output of the boiler.

Compared to the grant schemes introduced in 2016, the subsidy amounts for the establishment of a heating network and for the connection of a residential building to a heating.

As far as wood-fired boilers are concerned, subsidies will in future only be granted for existing buildings, as a heat pump is the.

For photovoltaic systems, the existing organisation, which combines the investment grant with the feed-in tariff, will be maintained. An.

Solar panels: A subsidy of 50% of the actual costs, capped at €1,250 per kWp, is granted for installations that produce green energy for self-consumption or as part of an energy community. For more details see the Klima-Agence website.
