

# **Government subsidy for mobile solar station in Norway**

## Overview

---

The subsidy is available for households in Norway. Step 2: Understand the Subsidy Amount The subsidy for solar installations post-October 2023 is NOK 7,500 + NOK 1,250 per kW installed. Calculate the potential subsidy you can receive based on your installation's capacity.

The subsidy is available for households in Norway. Step 2: Understand the Subsidy Amount The subsidy for solar installations post-October 2023 is NOK 7,500 + NOK 1,250 per kW installed. Calculate the potential subsidy you can receive based on your installation's capacity.

From government subsidies to tax breaks, this guide sheds light on the opportunities awaiting households and businesses in Norway. What is Enova?

Enova is a Norwegian government enterprise dedicated to promoting environmentally friendly production and consumption of energy. Their mission is to.

Norway's clean energy agency Enova will increase the maximum PV system size eligible for rebates from 15 to 20 kW and the maximum subsidy amount from 1,250 to 2,000 NOK (\$226.7) per kW installed. In addition, new subsidies of up to 10,000 NOK will be introduced for energy management systems that.

The country is rapidly expanding its solar footprint and is expected to reach 11.7 GW by 2030 (Solar Power Europe, 2023), where most of these are expected at utility scale. The government supports solar PV installations through net metering schemes and tax exemptions, making solar energy a viable.

Norway continues to refine its electricity subsidy framework to ensure affordability and predictability for households—especially relevant for those investing in EV charging infrastructure. As of 2025, two distinct programs are in effect: the established Strømsstøtte scheme and the newly introduced.

In January 2015, the Norwegian energy agency ENOVA improved the national subsidy scheme that grants energy efficiency technologies as well as

renewable energies in the residential sector since 2008. Since 2015 the applicant has a legal right for the funding“ if the household fulfills all eligible.

Norway's government has announced a significant change to how its energy bill subsidy scheme will work. Here's what households need to know about changes to their bill. On Wednesday evening, Prime Minister Jonas Gahr Støre, Finance Minister Trygve Slagsvold Vedum and Oil and Energy Minister Terje. Will Norway increase its subsidy for household electricity bills?

OSLO, Jan 10 (Reuters) - Norway's minority government plans to further increase its subsidy for household electricity bills amid a spike in winter season power prices, the energy ministry said.

What are the new solar rebates in Norway?

Norway's clean energy agency Enova will increase the maximum PV system size eligible for rebates from 15 to 20 kW and the maximum subsidy amount from 1,250 to 2,000 NOK (\$226.7) per kW installed. In addition, new subsidies of up to 10,000 NOK will be introduced for energy management systems that are often installed alongside solar arrays.

How much solar power does Norway have in 2023?

In 2023, solar PV provided 1% of the electricity into the Finnish grid (Electricity Maps, 2024). Norway, having had plenty of hydropower, only recently began to tap into solar energy. The Norwegian Water Resources and Energy Directorate (NVE, 2024) reported a total installed capacity of around 0.6 GW by the end of 2023.

How much solar power does Norway have?

The Norwegian Water Resources and Energy Directorate (NVE, 2024) reported a total installed capacity of around 0.6 GW by the end of 2023. About half of the capacity is installed on households - the rest for industrial and commercial use, with a very limited Utility scale solar.

Why are solar PV installations increasing in Sweden?

In Sweden, solar PV installations have grown exponentially. As of 2023, the country had a total installed solar PV capacity of 4.1 GW. This surge is largely attributed to government initiatives such as investment support schemes, which cover up to 20% of the installation costs for solar PV systems.

Is solar energy a viable option in Europe?

The country is rapidly expanding its solar footprint and is expected to reach 11.7 GW by 2030 (Solar Power Europe, 2023), where most of these are expected at utility scale. The government supports solar PV installations through net metering schemes and tax exemptions, making solar energy a viable and attractive option.
