

Government subsidy for mobile solar station in Tunisia

Overview

66,000 households are scheduled to take part in this initiative. A subsidy of 1,500 dinars will be granted for each PV installation. In addition, a subsidized loan of up to 3,000 dinars, will be granted to eligible households via their electricity bill.

66,000 households are scheduled to take part in this initiative. A subsidy of 1,500 dinars will be granted for each PV installation. In addition, a subsidized loan of up to 3,000 dinars, will be granted to eligible households via their electricity bill.

Major investments in solar power could be coming to Tunisia after the local government granted building licenses to multiple international solar companies. The North African country awarded more than \$386 million worth of licenses to solar firms from France, Norway, and Japan. The projects will be.

The ELMED interconnection project, which will link Tunisia to Italy by 2028, will play a key role in stabilizing energy supply, while supporting the energy transition in Tunisia and Europe. In addition, a network code has been drawn up to ensure the efficient integration of renewable energy.

Both agreements mark crucial milestones for the Tunisian renewable energy strategy, as PROSOL ELEC Economique will finance residential photovoltaic (PV) systems for 65,000 middle-income households in the whole country. The energy transition on the roofs of the Tunisian middle class is thus.

The Government of Tunisia (GoT) has embarked on an ambitious path to increase its renewable energy production. The GoT plans to reach 35% of renewable energy in the electricity system capacity by 2030, against 3% currently. Renewable energy is then expected to cover 50% of the electricity needs by.

In May 2005, the Tunisian Government passed a law promoting electricity generation from renewable sources. A government decision in 2016 and further implementing provisions brought the law into effect. The law provides for 30 per cent of electricity to be produced from renewable energy sources

by.

Renewable energy in Tunisia can address not only its energy poverty but also broader economic and social issues, creating a sustainable path for development. However, the push for renewable energy raises significant questions about equity, local benefits and just transitions. Recent initiatives in. What is the Tunisian Solar Plan (TSP)?

The Tunisian Government is successfully implementing the Tunisian Solar Plan (TSP), developing renewable energy on a large scale and complying with the agreed climate protection contributions. The project provides policy advice with the support of national and international technical, financial and legal experts.

How will the World Bank support Tunisia?

The World Bank and the TERI Umbrella Program will continue to support Tunisia to make its ambitious energy transition a reality. As previously mentioned, the World Bank will support the launch of 2GW of renewable independent power producer (IPP) projects as well as partly finance the construction of the transformational ELMED project.

Does Tunisia need a reform agenda?

The report recommends adopting and implementing a necessary reform agenda to meet Tunisia's external financing requirements and to promote sustainable economic growth. "Tunisia's economy remains under pressure, and reforms are urgently needed to improve the business environment and strengthen competition.

Are government's plans to reduce energy subsidies a step in the right direction?

Government's plans to reduce energy subsidies are a step in the right direction, and it is crucial to swiftly implement them and adopt complementary policies so as to ensure a sustainable recovery," stated Alexandre Arrobbio, World Bank's Country Manager for Tunisia.

Why did Tunisia refinance Treasury bonds?

Given the limited access to international financing, Tunisia's Central Bank continued refinancing the domestic banking sector for treasury bond purchases. Local financing of the debt remains challenging given that inflation

is at its highest level in over three decades (due to rising global prices).

How did the global price hike affect Tunisia?

The global price hike also resulted in higher consumer subsidies, particularly energy, putting pressure on the budget and public debt. Given the limited access to international financing, Tunisia's Central Bank continued refinancing the domestic banking sector for treasury bond purchases.
