

Government subsidy for mobile solar unit in Bangladesh

Overview

How much are energy subsidies in Bangladesh?

Total energy subsidies for the FY 2012 are estimated at more than BDT282 billion (US\$3.4 billion), almost 90 per cent of the total amount spent on all subsidies. Nearly 34 per cent of these subsidies are off-budget, such as government loans for Bangladesh Power Development Board at favourable lending rates.

What is the role of subsidies in Bangladesh?

Introduction The Government of Bangladesh, like many countries around the world, has used subsidies for decades to promote a wide range of social and economic objectives. The government provides subsidies in a number of areas, including agriculture, petroleum products, electricity, health, education and food.

Should Bangladesh support energy access for the poor?

While there is a clear need to support energy access for the poor in Bangladesh, current fuel and electricity subsidies are an expensive and ineffective means for doing so. The government is spending more than 4 per cent of GDP on energy subsidies—more than it spends on health and social welfare programs.

How much does the government spend on energy subsidies?

The government is spending more than 4 per cent of GDP on energy subsidies—more than it spends on health and social welfare programs. Proper pricing of primary fuel and energy is important to conserve energy and to attract domestic and foreign private investments in the energy sector.
