Government subsidy for mobile solar unit in France

Overview

Does France offer subsidies for solar panels?

Many regions in France offer additional subsidies for solar panel installations. These initiatives can significantly lower initial costs. To qualify for government subsidies, it is recommended to hire certified professionals with the RGE (Reconnu Garant de l'Environnement) license.

How much does a ground-mounted solar project cost in France?

Broadly speaking, for ground-mounted solar projects located in mainland France, the FIT will be reduced from EUR 570 per MwH to EUR 30 per MwH. The minimum FIT will be in the range of EUR 18 to EUR 50 per MwH, and the average FIT will be around EUR 30 per MwH.

How does VAT affect solar panels in France?

This helps accelerate the return on investment in solar panels. A reduced VAT rate of 10% instead of the standard 20% applies to solar panel installations in France. This measure is available for residential properties used as primary homes. Many regions in France offer additional subsidies for solar panel installations.

Can solar panels be installed on a home in France?

Schemes to help with installing solar panels on homes in France have been continued this year, providing a number of options to help those making the switch to this kind of renewable energy.

Do I need a permit to install solar panels in France?

Before installing solar panels in France, it is important to determine whether a special permit is required. For most residential homes, bureaucratic procedures are minimal, but certain factors may require additional approvals.

What is a solar subsidy?

It is a one-off subsidy paid for by energy suppliers to help cover some of the costs of panel installation and is aimed at solar thermal panels, whether just to heat hot water or also for the central heating system. Photovoltaic panels are not eligible
