

Government subsidy for mobile solar unit in Luxembourg

Overview

The focus is on heat pumps, thanks to the increased grant amounts for the installation of heat pumps and eligibility for air-water heat pumps.

Subsidies for wood heating can only be granted for existing buildings. For pellet and wood log boilers, grants will now be determined according to the rated thermal output of the boiler.

Compared to the grant schemes introduced in 2016, the subsidy amounts for the establishment of a heating network and for the connection of a residential building to a heating.

As far as wood-fired boilers are concerned, subsidies will in future only be granted for existing buildings, as a heat pump is the.

For photovoltaic systems, the existing organisation, which combines the investment grant with the feed-in tariff, will be maintained. An.

The "KLIMABONUS 522" program is a Luxembourgish government initiative that provides financial incentives for the installation of solar photovoltaic (PV) systems. The program offers a flat-rate subsidy of €500 per kilowatt-peak (kWp) of installed capacity, up to a maximum of 50 kWp.

The "KLIMABONUS 522" program is a Luxembourgish government initiative that provides financial incentives for the installation of solar photovoltaic (PV) systems. The program offers a flat-rate subsidy of €500 per kilowatt-peak (kWp) of installed capacity, up to a maximum of 50 kWp.

State subsidies for sustainable housing and mobility, promotion of renewable energy and forest estate management Climate change is not coming. It is already here. The signs of climate change are clear: we all need to act now. That's why Klimabonus provides financial support to encourage individual.

Several schemes are in place to support the energy renovation of housing in Luxembourg. These are subsidies for carrying out insulation projects, replacing windows or installing a less energy-intensive and more environmentally friendly heating system (such as heat pumps, wood heating and thermal.

How do you apply for aid?

It is generally necessary to count between €2,100 and €2,300 per kWp (kilowatt-peak or peak power) of photovoltaic cells (taking into account the total cost: supports, fixing, panels, inverters, etc). For a standard 5 kWp roof in Luxembourg, the total cost excluding grants.

The subsidy from the municipality will be 30% of the State subsidy (max 7200 EURO). The subsidy from the municipality will be 50% of the State subsidy (max 5000 EURO). The subsidy from the municipality will be 35% of the State subsidy (max 8500 EURO). The subsidy from the municipality will be 20%.

Residents of Luxembourg can currently benefit from 62.5% state support when installing solar panels, a policy in place until 1 July 2024. Since early 2024, the Socom company has been producing solar panels in Hollerich. Marc Thein, President of both Socom and the Technical Engineering Federation.

Pour faciliter cet investissement, le gouvernement et les communes proposent diverses aides financières qui permettent de réduire le coût d'une telle installation. Ces aides, qu'elles soient nationales ou communales, visent à encourager l'autoconsommation et à promouvoir l'utilisation d'énergies.
