

Government subsidy for off-grid solar container in Indonesia

Overview

The Indonesian Ministry of Energy and Mineral Resources (EMR) and the United Nations Development Program (UNDP) Indonesia launched an incentive program for rooftop solar systems under a Sustainable Energy Fund (SEF) grant. What is a floating solar plant in Indonesia?

The project was developed by a unit of Indonesia's state utility company, Perusahaan Listrik Negara (PLN), in collaboration with United Arab Emirates renewable energy company Masdar, a unit of Mubadala Investment Company. The plant is the third-largest floating solar plant in the world.

Can solar panels be sold back to the grid?

Under this program, solar panel system owners are allowed to sell excess electricity generated back to the grid. This means that if a solar panel system produces more electricity than is consumed, the surplus can be fed back into the grid, and the system owner receives credits or payment for the excess electricity.

How do I apply for a SEF grant for rooftop solar systems?

For rooftop solar systems bought in installments, applicants must provide proof of transfer to the lender. Please refer to the ISURYA application () for complete information on the criteria, requirements, and flow of application of the SEF grant for rooftop solar systems incentives. (IY)
