

# **Government subsidy for portable pv system in Sweden**

✓ 100KWH/215KWH

✓ LIQUID/AIR COOLING

✓ IP54/IP55

✓ BATTERY 6000 CYCLES

## Overview

---

The tax reduction provides a 20% deduction on material and installation costs for solar panels, and a 50% deduction for batteries and charging points. Grön teknik is only available for private individuals. The maximum limit for grön teknik is 50,000 SEK per person per year. Will Sweden reduce the subsidy for solar?

The Swedish government is considering reducing the subsidy for solar installations and removing the income tax reduction for households and businesses that micro-produce renewable electricity. Svensk Solenergi, Sweden's leading solar association, has criticized the proposals.

What subsidies are available for solar roof installations?

There are two main subsidies, the Green Deduction (grön teknik) and ROT. Generally, one can avail of either the grön teknik or the ROT deduction, but not both. In the case of solar roof installations, it's possible to utilize both the ROT and grön teknik.

Do PV system owners get subsidies in 2022?

However, as of 2022, no subsidies exist except for the private domestic PV market segment. In general, a PV system owner that sells the excess electricity will receive compensation from the electricity trading utility company and from the grid owner. The compensation varies depending on the grid owner.

Will the government stop subsidized solar cells?

It also plans to scrap the tax reduction for the micro-production of renewable electricity. The ministry said in a statement on the government's website that installations have increased sharply, which is why there is no longer a need to subsidize solar cells.

Does Sweden have a deadline to transpose energy communities?

Delayed Energy Communities Legislation: Despite passing the deadline in 2021, Sweden has not adopted legislation transposing energy communities, potentially impeding community-based renewable energy initiatives.

Does Sweden have smart meter penetration?

Solar installation rates have grown significantly, yet challenges still persist, including a shortage of trained installers. Nonetheless, Sweden leads in smart meter penetration at 100%. This country profile highlights the good and the bad policies and practices of solar rooftop PV development within Sweden.
