

Government subsidy for portable solar container in Vietnam

TAX FREE

Product Model

HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions

1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity

215KWH/115KWH

Battery Cooling Method

Air Cooled/Liquid Cooled

Overview

Households installing rooftop solar systems for self-generation and self-consumption, with integrated battery storage, are expected to benefit from multiple support policies, including financial subsidies and preferential loans.

Households installing rooftop solar systems for self-generation and self-consumption, with integrated battery storage, are expected to benefit from multiple support policies, including financial subsidies and preferential loans.

On 22 October 2024, the Vietnamese government promulgated its long-awaited Decree No. 135/2024/ND-CP governing the mechanism and policy for incentivising the development of self-consumption rooftop solar power systems ("RTS") ("Decree 135"). Decree 135 provides the legal basis for developing such.

After a long wait, the Government has officially issued Decree No. 135/2024/ND-CP dated 22 October 2024, providing mechanisms and policies to encourage the development of on-site self-consumption rooftop solar power ("Decree 135"). The Decree comes into effect on 22 October 2024 with the following.

On 22 October 2024, the Government of Vietnam issued Decree No. 135/2024/ND-CP stipulating policies encouraging development of self-produced and self-consumed rooftop solar power ("Decree 135"), which would immediately take effect from the date of issuance. Decree 135 ends nearly four years of.

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems. The updated scheme highlights the growing importance of storage in stabilizing the.

Vietnam's solar power sector is governed by a number of key regulations and policies aimed at promoting the development of renewable energy while managing the challenges associated with rapid growth. The FiT program has been a major driver of solar power development in Vietnam, offering a tariff

of.

On 22 October 2024, the Vietnam Government issued Decree 135/2024/ND-CP to encourage the development of self-produced and self-consumed (" SPSC ") rooftop solar power (" Decree 135 "). Decree 135 came into effect on issuance. This Article highlights some of the key provisions of Decree 135. Why has the Vietnamese government temporarily suspended solar projects?

To address the rapid growth and grid capacity issues, the Vietnamese government has temporarily suspended new approvals for large-scale solar projects. This measure aims to manage the grid's ability to integrate new capacity and transition from the FiT scheme to an auction-based system for project approval and pricing.

What are the conditions for solar storage in Vietnam?

Conditions for systems with storage include a minimum storage capacity of 10% of the solar plant's installed capacity, a charge/discharge time of 2 hours, and at least 5% of total generation used for charging the storage system. Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FiTs were relatively low.

What challenges has Vietnam faced with anti-dumping tariffs on solar panels?

This speaks to the challenges Vietnam has faced related to anti-dumping tariffs on solar panels, particularly concerning accusations of illegal transshipments. Some foreign companies have attempted to label Chinese-made solar products as Vietnamese to bypass higher U.S. tariffs.

Are Chinese solar products circumventing US duties?

Late last year, some solar products exported from Vietnam, Thailand, Cambodia, and Malaysia were found to be circumventing duties applied to some Chinese solar products by the US Department of Commerce.
