

Government subsidy for portable solar generator in Romania

Overview

The Romanian government has launched a EUR-310.7-million (USD 353.5m) funding initiative to support the deployment of new renewable energy installations for self-consumption, largely solar plants.

The Romanian government has launched a EUR-310.7-million (USD 353.5m) funding initiative to support the deployment of new renewable energy installations for self-consumption, largely solar plants.

Romania is making significant strides in its commitment to sustainable energy by offering subsidies to local authorities to bolster the installation of solar power systems. This forward-thinking initiative is designed to empower municipalities to receive funding for projects that generate.

The Ministry of Energy provided EUR 28.8 million for 105 photovoltaic projects of 23.1 MW in total in almost all counties of Romania. The vast majority of the grants for solar power systems are for communes, the lowest-level municipal authorities. Prosumers have proven to be the main pillar of.

The €310 million (\$351 million) funding package includes over €268 million ringfenced for solar installations for self-consumption. The deadline for companies to submit applications is August 21. Romania's Ministry of Energy has launched its second funding call to support new renewable energy.

On 31 March 2022, the Romanian Ministry of Energy launched a call for projects under a new state aid scheme for supporting the development of new wind and solar power plants, with or without integrated power storage capacities (the "Support Scheme"). This is the first support scheme launched for.

The Romanian government launched a €3 billion state aid scheme for green energy, funded by the European Union, announced Prime Minister Marcel Ciolacu. In March, the European Commission approved a scheme to support onshore wind and photovoltaic solar installations. The Prime Minister notes that the.

The Romanian government has launched a EUR-310.7-million (USD 353.5m) funding initiative to support the deployment of new renewable energy installations for self-consumption, largely solar plants. The scheme, financed by the Modernization Fund, is the second one targeting self-consumption projects.
