

Government subsidy for portable solar power box in Tunisia

Overview

66,000 households are scheduled to take part in this initiative. A subsidy of 1,500 dinars will be granted for each PV installation. In addition, a subsidized loan of up to 3,000 dinars, will be granted to eligible households via their electricity bill.

66,000 households are scheduled to take part in this initiative. A subsidy of 1,500 dinars will be granted for each PV installation. In addition, a subsidized loan of up to 3,000 dinars, will be granted to eligible households via their electricity bill.

The ELMED interconnection project, which will link Tunisia to Italy by 2028, will play a key role in stabilizing energy supply, while supporting the energy transition in Tunisia and Europe. In addition, a network code has been drawn up to ensure the efficient integration of renewable energy.

Major investments in solar power could be coming to Tunisia after the local government granted building licenses to multiple international solar companies. The North African country awarded more than \$386 million worth of licenses to solar firms from France, Norway, and Japan. The projects will be.

The Tunisian authorities have provided \$121 million for solar thermal and PV systems. The subsidies can cover up to 30% of initial investments in residential PV installations. The Tunisian government said that it has renewed the financing mechanism for its two national residential solar programs.

Both agreements mark crucial milestones for the Tunisian renewable energy strategy, as PROSOL ELEC Economique will finance residential photovoltaic (PV) systems for 65,000 middle-income households in the whole country. The energy transition on the roofs of the Tunisian middle class is thus.

The report acknowledges Tunisia's significant potential but notes that the country's post-COVID economic recovery continued to be moderate (real GDP grew by 2.5 percent in 2022) due to the current pace of economic reforms, resulting in regulatory barriers to growth. Additionally, the report.

The Tunisian government has renewed the financing mechanism for its two national residential solar programs. Société Tunisienne d'Electricité et de Gaz (STEG) has secured a TND 370 million (\$121.1 million) financing agreement from Zitouna Bank for the Prosol Residential and Prosol Elec programs. How much money does Tunisian government provide for solar?

The Tunisian authorities have provided \$121 million for solar thermal and PV systems. The subsidies can cover up to 30% of initial investments in residential PV installations. The Tunisian government said that it has renewed the financing mechanism for its two national residential solar programs.

Why did Tunisia refinance Treasury bonds?

Given the limited access to international financing, Tunisia's Central Bank continued refinancing the domestic banking sector for treasury bond purchases. Local financing of the debt remains challenging given that inflation is at its highest level in over three decades (due to rising global prices).

Are government's plans to reduce energy subsidies a step in the right direction?

Government's plans to reduce energy subsidies are a step in the right direction, and it is crucial to swiftly implement them and adopt complementary policies so as to ensure a sustainable recovery," stated Alexandre Arrobbio, World Bank's Country Manager for Tunisia.
