

Government subsidy for power container in Argentina

Overview

Is there a subsidy system in Argentina?

The Incidence of Subsidies to Residential Public Services in Argentina: The Subsidy System in 2014 and Some Alternatives (CEDLAS, Working Papers No. 0201). CEDLAS, Universidad Nacional de La Plata. Levinson, A., & Silva, E. (2022). The Electric Gini: Income Redistribution through Energy Prices.

Does subsidized energy in Argentina have a distributional impact?

Argentina has massively subsidized energy in recent decades and the distributional impact of this policy has been extensively studied. However, previous research has generally omitted the consideration of public financing. We extend the analysis in this direction with a conceptual framework and measurement for the electricity sector.

Can a large user buy electricity from a renewable generator in Argentina?

In Argentina, for a large user, is generally less expensive to purchase electricity directly from a renewable generator than to purchase it from the grid administrator CAMMESA. Furthermore, large users are, as a rule, barred from purchasing electricity directly from a thermal generator.

Are there liquefied natural gas regasification facilities in Argentina?

There have been two liquefied natural gas (LNG) regasification facilities in Argentina, including in Bahia Blanca and Escobar in recent years. Regasification is the process of converting liquefied natural gas (LNG) back into a gaseous state.
