Under the 2024-25 program, households are eligible for up to \$300 of energy bill relief, and eligible small businesses may receive up to \$325. Table 1 below summarises the EBRF programs, and the fact sheet linked below provides additional information for retailers.

Under the 2024-25 program, households are eligible for up to \$300 of energy bill relief, and eligible small businesses may receive up to \$325. Table 1 below summarises the EBRF programs, and the fact sheet linked below provides additional information for retailers.

The Australian Government has announced a \$1.8 billion extension of the Energy Bill Relief Fund by six months in the 2025–26 Budget. Australian households and eligible small businesses with electricity bills may receive up to \$150 in energy bill rebates from 1 July 2025 to the end of 2025. Rebates.

You may be eligible for grants, loans and concessions to help pay for rates and power bills. If you need help with paying bills or are experiencing financial hardship, there is help available. Find out more about how to manage bills. You may also get the Energy Bill Relief Fund if you receive.

Indeed, the current federal government has further increased subsidies in an effort to achieve its ambitious goal of having renewables supply 82% of national electricity by 2030. The 2024-25 budget allocates more than \$22 billion to boost renewables in Australia. This includes \$13.7 billion in.

The Australian Government is leading efforts to decarbonise South Australia's ports through a comprehensive electrification initiative. With a \$70 million investment through the Clean Energy Finance Corporation (CEFC) into Flinders Port Holdings (FPH), this initiative marks the first green.

With over 70 per cent of Australians naming cost-of-living as a priority issue, the Clean Energy Council has welcomed the additional \$150 energy bill rebate for all Australian families and small businesses in this years' Federal Budget, while reinforcing its call for a national home battery program.

The Power Saving Bonus program provides a payment of \$100 for eligible Victorian concession card households. To be eligible, households will need to: Only one payment is available per household. To find out more and make an application for the Power Saving Bonus, visit the Victorian Energy Compare. How do electricity subsidies work in Australia?

These subsidies include direct government transfers funded by taxpayers and transfers from private entities to renewable energy providers as mandated by government policies. The latter costs are typically recovered by electricity retailers and passed on to the Australian public in the form of increased electricity surcharges.

How can new subsidies help reduce energy costs?

Focus on Sustainability: New subsidies are tied to emissions reduction. The Home Energy Upgrade Fund, for instance, offers low-interest loans and grants for insulation, heat pumps, and efficient appliances—helping homes cut energy use and bills.

Why are subsidies important in Australia?

Subsidies have long been a cornerstone of Australian government policy, designed to make essential goods and services more accessible, spur innovation, and support vulnerable communities.

Do government subsidies help the renewables industry?

However, these claims are complicated by the substantial government subsidies supporting the renewables industry. Renewable energy proponents contend that initial government support would enable the renewables industry to achieve the technological improvements and economies of scale needed to become independently profitable.

Where can I find energy rebates & concessions in Australia?

Find available assistance from the Australian Government and state and territory governments. Please note, energy.gov.au does not administer any rebates or concessions. For more information, please visit the website in each listing.

How much does a carbon-emitting subsidy cost?

It does not, for instance, consider the following subsidies which are collectively

substantial: The Safeguard Mechanism requiring major carbon-emitting companies to reduce their emissions or purchase carbon credits, with one estimate putting the cost at \$906 million per year.
