

Government subsidy for pv storage container in Guernsey

Overview

There are no subsidies or incentives offered by the States of Guernsey for renewable energy systems. There is a single-rate tariff for customers with private generators (such as solar panels) who want to sell their excess units to Guernsey Electricity. How can Guernsey support a vibrant economy?

Supporting a vibrant economy - A clean, reliable, and affordable energy supply is a fundamental economic enabler. Establishing an environment for the development of on-island (including offshore) renewables will support the diversification and vibrancy of Guernsey's economy.

What is the energy transition in Guernsey?

In Guernsey, we currently rely on fossil-fuel based systems of energy production and consumption and operate a thermal power station. However, it is recognised that as part of the response to climate change, there is a need to transition to an energy mix with limited, if not zero carbon emissions. This is often referred to as the energy transition.

Why should Guernsey invest in offshore renewables?

Establishing an environment for the development of on-island (including offshore) renewables will support the diversification and vibrancy of Guernsey's economy. A shift to decarbonisation in Guernsey will be an essential reputational advantage to support the growth of the green finance sector.

Does Guernsey Electricity need a 'accounting unbundling' exercise?

Guernsey Electricity will be required to undertake an 'Accounting Unbundling' exercise which involves separating the accounts associated with various activities undertaken within the business. This is needed to ensure transparency and fairness within the market.

Should Guernsey shift to decarbonisation?

A shift to decarbonisation in Guernsey will be an essential reputational advantage to support the growth of the green finance sector. Establishing a clean and secure energy supply is a significant component of decarbonisation and assists in delivering the credibility and reputation that underpin growth in green finance.

Where should an offshore wind array be located in Guernsey?

Feasibility studies to date have shown that the most optimal location for an offshore wind array in Guernsey's territorial waters is the west coast. The offshore wind feasibility report completed in 2016 is available in the downloads section of this page, along with a summary document.

Government subsidy for pv storage container in Guernsey

Solar in Gujarat: Potential, Solar Policy and Subsidy ...

In 2019, the Gujarat government introduced the Surya solar subsidy scheme to develop 1.6 GW of solar rooftop capacity by March 2022. Though the target was not met, between 2019 and March 2022, the state was ...
