

Government subsidy for pv storage container in Tunisia

Overview

Eligible households will benefit from a 1,500 TND (approx. 470 EUR) investment subsidy as well as a subsidised loan with only 3% interest. This loan is automatically repaid through the monthly electricity bill.

Eligible households will benefit from a 1,500 TND (approx. 470 EUR) investment subsidy as well as a subsidised loan with only 3% interest. This loan is automatically repaid through the monthly electricity bill.

The Tunisian authorities have provided \$121 million for solar thermal and PV systems. The subsidies can cover up to 30% of initial investments in residential PV installations. The Tunisian government said that it has renewed the financing mechanism for its two national residential solar programs.

Major investments in solar power could be coming to Tunisia after the local government granted building licenses to multiple international solar companies. The North African country awarded more than \$386 million worth of licenses to solar firms from France, Norway, and Japan. The projects will be.

In 2010, Tunisia launched the Prosol Elec program to promote the installation of solar panels on roofs connected to the low-voltage grid through subsidies and loans. MW of solar panels by December 2024. 1,200 and 1,800 kWh/ year. 66,000 households are scheduled to take part in this initiative.A.

Both agreements mark crucial milestones for the Tunisian renewable energy strategy, as PROSOL ELEC Economique will finance residential photovoltaic (PV) systems for 65,000 middle-income households in the whole country. The energy transition on the roofs of the Tunisian middle class is thus.

The Tunisian government has renewed the financing mechanism for its two national residential solar programs. Société Tunisienne d'Electricité et de Gaz (STEG) has secured a TND 370 million (\$121.1 million) financing agreement from Zitouna Bank for the Prosol Residential and Prosol Elec programs.

The Tunisian Solar Plan (PST) is the national program aiming at reaching the renewable energy development strategy targets. The goal is to increase the

total share of renewables in the electricity generation mix from 3% today to 30% by 2030. In order to reach these targets, Tunisia has implemented.
