

Government subsidy for retractable solar panel container in Tunisia

Overview

66,000 households are scheduled to take part in this initiative. A subsidy of 1,500 dinars will be granted for each PV installation. In addition, a subsidized loan of up to 3,000 dinars, will be granted to eligible households via their electricity bill.

66,000 households are scheduled to take part in this initiative. A subsidy of 1,500 dinars will be granted for each PV installation. In addition, a subsidized loan of up to 3,000 dinars, will be granted to eligible households via their electricity bill.

The ELMED interconnection project, which will link Tunisia to Italy by 2028, will play a key role in stabilizing energy supply, while supporting the energy transition in Tunisia and Europe. In addition, a network code has been drawn up to ensure the efficient integration of renewable energy.

Major investments in solar power could be coming to Tunisia after the local government granted building licenses to multiple international solar companies. The North African country awarded more than \$386 million worth of licenses to solar firms from France, Norway, and Japan. The projects will be.

The report acknowledges Tunisia's significant potential but notes that the country's post-COVID economic recovery continued to be moderate (real GDP grew by 2.5 percent in 2022) due to the current pace of economic reforms, resulting in regulatory barriers to growth. Additionally, the report.

The Tunisian authorities have provided \$121 million for solar thermal and PV systems. The subsidies can cover up to 30% of initial investments in residential PV installations. The Tunisian government said that it has renewed the financing mechanism for its two national residential solar programs.

Implemented by ANME and GIZ, the programme is co-financed by the Mitigation Action Facility and the Government of Tunisia, in close collaboration with Attijari Bank, as well as STEG. By providing financial incentives for middle-income households to install PV systems, the programme aims to increase.

Tunisia plans to invest over a billion dollars in renewable energy in the next two years. The scheme aims to reduce the dependence on fossil fuels and overcome structural challenges. Tunisia recently launched a call for a bid on renewable energy projects to produce 1,700 megawatts (MW) nationally.
