

Government subsidy for retractable solar panels in Luxembourg

Overview

The Luxembourg government encourages the adoption of renewable energy by offering various financial assistance for the installation of solar panels. This program offers a subsidy covering up to 50% of installation costs for self-use systems , with a threshold of 1,250 euros per kWp installed. How long will Luxembourg's green energy subsidies last?

Financial subsidies for homes switching to green energy systems are to be extended for a further two years, the government said on Friday. Luxembourg households seeking to upgrade to renewable and more energy-efficient sources will continue to benefit from a top-up payment covering 25% of the cost of renovation, in addition to the basic support.

What's next for solar panel and heat pump grants in Luxembourg?

Residents of Luxembourg can currently benefit from 62.5% state support when installing solar panels, a policy in place until 1 July 2024. Since early 2024, the Socom company has been producing solar panels in Hollerich.

Do photovoltaic systems get a subsidy?

At present, photovoltaic systems intended for self-consumption receive a 62.5% subsidy from the state. Additionally, municipalities contribute varying amounts; some offer a lump sum, while others cover up to 90% of the remaining costs. However, the 12.5% aid included in the tripartite agreement will expire on 1 July 2024.

Will subsidies be extended for solar panels & electric cars?

However, level of financial support for installing solar panels and purchase of electric cars will be reduced Financial subsidies for homes switching to green energy systems are to be extended for a further two years, the government said on Friday.

How much does a solar panel subsidy cost?

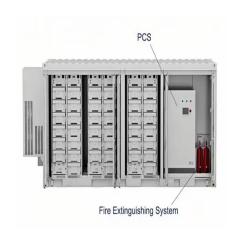

While this subsidy currently covers up to 62.5% of the installation costs (with a ceiling of €1,562/kW), from October it will be reduced to 50% (with a ceiling of €1,250/kW). The economic context has changed since the more generous subsidies for solar panels were introduced two years ago, said Wilmes.

How much will a new electric car subsidy cost?

There will be no basic minimum level of subsidies granted, a huge change from the current set-up, whereby motorists are offered between €3,000 to €8,000. Buyers of electric cars will instead be offered support of up to €6,000 depending on the model, according to Frieden's proposals.
