The REPowerEU programme, run by the Ministry of European Investments and Projects (MIPE), provides vulnerable households in Romania with financial support for the rehabilitation of their homes and the installation of solar panels. The funding is provided through the National Recovery and Resilience.

A total of 60,000 households in Romania will be able to benefit from funds for installing photovoltaic panels and batteries, as well as funds for increasing the energy efficiency of homes, the minister of investments and European projects, Adrian Căciu, recently announced. The funds were made.

Romania is making significant strides in its commitment to sustainable energy by offering subsidies to local authorities to bolster the installation of solar power systems. This forward-thinking initiative is designed to empower municipalities to receive funding for projects that generate.

The Environment Fund Administration (AFM) of Romania said it funded almost 2,000 projects in the past three years through its Casa Verde Fotovoltaice subsidies scheme for solar panels and that it would launch another round next month. However, nearly 9,000 applications that were accepted last time.

The Romanian authorities say that its new state budget will facilitate the deployment of more than 150,000 PV systems. Romanian Prime Minister Nicolae Ciucă says the government will allocate RON 3 billion (\$666.2 million) this year for the Casa Verde Fotovoltaice (green PV home) scheme, in order

to.

On 31 March 2022, the Romanian Ministry of Energy launched a call for projects under a new state aid scheme for supporting the development of new wind and solar power plants, with or without integrated power storage capacities (the " Support Scheme "). This is the first support scheme launched for.
