

Government subsidy for retractable solar panels in Yemen

Overview

The project created financing windows for high-quality, small-scale solar solutions, and provided partial subsidies to beneficiaries to make these systems affordable for them.

The project created financing windows for high-quality, small-scale solar solutions, and provided partial subsidies to beneficiaries to make these systems affordable for them.

Between 2018 and 2022, the World Bank's Yemen Emergency Electricity Access Project (YEEAP), sought to leverage solar energy facilities to improve access to electricity in rural and peri-urban areas. Yemenis suffered from severe energy poverty, especially people living in rural areas and the poor.

A project between UNOPS and the World Bank will help finance off-grid solar systems to power vital basic services and improve access to electricity for vulnerable populations. Solar power has proved to be the most immediate solution for severe energy shortages throughout Yemen. A booming solar.

The tremendous increase in fuel prices and Yemen's frequently failed public electricity grid have left citizens with few options: they can install individual solar systems in their homes or subscribe to a private diesel-powered energy grid. Both options are expensive and renewable energy is too.

However, as alternatives have been unavailable, the country has turned to decentralised solar energy, giving rise to an unprecedented deployment of solar (home) systems. This report uses own calculations, new household surveys, and extensive literature research to document Yemen's solar revolution.

Electricity Consumption in kWh/capita (2020) 109.0 Getting Electricity Score (2020) Ease of doing Solar classification Progressive Cumulative Solar Capacity in MW (2021) 252.8 Human Development Index (2021) Yemen Asia & Pacific Average PVout in kWh/kWp (2020) NDC Target by 2030 in % (base year).

The United Nations Development Programme (UNDP) works across Yemen to support people and communities with solutions to this issue by providing solar power, hydropower, and other renewable energy solutions. With a large presence on the ground, it is vital that UNDP can continuously serve the Yemeni.
