## Overview

---

Financial incentives such as direct subsidies have played a pivotal role in boosting solar power in many countries worldwide. Unfortunately, there are no subsidies or feed-in tariffs for solar power in New Zealand, and there never have been.

Financial incentives such as direct subsidies have played a pivotal role in boosting solar power in many countries worldwide. Unfortunately, there are no subsidies or feed-in tariffs for solar power in New Zealand, and there never have been.

**Solar Subsidy and Rebate:** At the heart of Labour's solar strategy is the solar subsidy. Households are set to benefit from a \$2,000 solar rebate to promote rooftop solar adoption. What's more, an additional \$2,000 bonus awaits those incorporating a battery into their systems. **Community Solar.**

The Solar Energy market size in New Zealand is expected to grow at a CAGR of greater than 3%. The market is diversified based on residential, commercial & industrial users and the market is governed by five major players. In 2007, a government subsidy for a solar hot water system was launched. An.
