IMF Selected Issues Papers are prepared by IMF staff as background documentation for periodic consultations with member countries. It is based on the information available at the time it was completed on May 30, 2025. This paper is also published separately as IMF Country Report No 25/149. IMF.

Libya has announced a \$10 billion solar power initiative aimed at producing 10 gigawatts of energy within the next decade. This program is a key part of the country's strategy to transition from its reliance on fossil fuels and meet rising domestic energy demands. The plan, unveiled by the Ministry.

Libya has set an ambitious target to source up to 20% of its electricity from renewable energy resources by 2035 through a strategy that has gained the support of global partners. Established last October and announced earlier this month, the strategy is considered a strategic economic move by the.

Historically recognized for its vast oil reserves, Libya's government is now prioritizing the diversification of its energy portfolio to include solar and wind power. This shift comes as the country grapples with declining oil production and seeks to harness its extensive desert landscapes for.

Libya's vast untapped renewable energy resources has been lucrative to many governments including the Libyan government which is targeting a 22% share of renewables in its energy mix by 2030, aiming for 2250 MW of installed capacity by 2024. To attract the international community, the Libya.

The government may then allocate a subsidy to the electricity company to compensate for any losses until electricity tariffs reflect real production costs. Furthermore, residential and commercial electricity meters must be changed to prepaid systems and illegal connections must be terminated to.
