The sixth edition of the Polish government's residential solar and storage rebate scheme is now open, with a total budget of PLN 400 million (\$103.2 million). Applications will be accepted until Dec. 20, or until funds are exhausted. Poland's National Fund for Environmental Protection and Water.

Poland's 2024-2025 energy storage subsidy programs are a key element in the country's energy transition. With the growing demand for stable energy sources and the integration of renewables into the grid, energy storage facilities take on special importance. The National Fund for Environmental.

Poland's Ministry of Climate and Environment has announced the launch of the sixth edition of the "My Electricity" (Mój Prąd) program. This initiative, set to begin on September 2, 2024, and run until December 20, 2024, or until funds are depleted, aims to further support the adoption of renewable.

The application for the sixth phase of Poland's "Mój Prąd" (My Electricity) rebate program began earlier this month, offering a total subsidy of PLN 400 million (approximately CNY 738 million) for residential photovoltaic (PV), battery storage, and hot water storage systems. Applies to net-metering.

The government will next month increase the size of the state subsidies available to households for the installation of solar panels and energy storage, climate minister Anna Moskwa has announced. Since 2019, the government's Mój Prąd (meaning My Electricity) programme has offered subsidies for.

In early 2024, Polish Secretary of State Urszula Zielińska announced that the government is considering setting a date for the final phase-out of coal, as

coal-based power generation is economically unfeasible and threatens energy security. Therefore, a total subsidy of up to 400 million PLN is.
