## Overview

---

The PITEIB programme is an innovative support initiative of the Spanish government that aims to offer financial support to individuals and companies wishing to invest in sustainable energy sources such as solar panels and battery storage.

The PITEIB programme is an innovative support initiative of the Spanish government that aims to offer financial support to individuals and companies wishing to invest in sustainable energy sources such as solar panels and battery storage.

An updated compilation of all the grants, rebates and subsidies that you can apply for in Spain for your self-consumption installation. Spain is one of the countries in Europe with the most hours of sunlight. This is a fact that we can and must take advantage of to continue fighting climate change.

Solar panel subsidies ended on 31st December 2023. But don't leave this page yet. There are still three important things to know: You might be disappointed to read that solar panel grants in Spain (sometimes amounting to over €3,000 for regular-sized solar panel installations) are not set in stone.

Discover how this government subsidy can help you invest in solar panels, battery storage systems and other sustainable technologies. Introduction to the PITEIB renewable energy subsidy programme The PITEIB programme is an innovative support initiative of the Spanish government that aims to offer.

Spain's €700M BESS Container Subsidy isn't just a pile of cash—it's a golden ticket for energy pros. This piece breaks down who qualifies (hint: standard BESS gets €250/kWh, grid-forming systems score €300/kWh), how to navigate the application maze (deadline July 15, 2025 —mark it!), and why.

Para superar esta barrera, los gobiernos de diversos niveles han ideado incentivos estratégicos en forma de subvenciones y apoyo financiero para impulsar la adopción de la energía solar. El cambio global hacia las energías renovables está modificando radicalmente el paradigma energético. La energía.
