

Government subsidy for solar panel mount for container in Tunisia

Overview

66,000 households are scheduled to take part in this initiative. A subsidy of 1,500 dinars will be granted for each PV installation. In addition, a subsidized loan of up to 3,000 dinars, will be granted to eligible households via their electricity bill.

66,000 households are scheduled to take part in this initiative. A subsidy of 1,500 dinars will be granted for each PV installation. In addition, a subsidized loan of up to 3,000 dinars, will be granted to eligible households via their electricity bill.

The ELMED interconnection project, which will link Tunisia to Italy by 2028, will play a key role in stabilizing energy supply, while supporting the energy transition in Tunisia and Europe. In addition, a network code has been drawn up to ensure the eficient integration of renewable energy.

Major investments in solar power could be coming to Tunisia after the local government granted building licenses to multiple international solar companies. The North African country awarded more than \$386 million worth of licenses to solar firms from France, Norway, and Japan. The projects will be.

The report acknowledges Tunisia's significant potential but notes that the country's post-COVID economic recovery continued to be moderate (real GDP grew by 2.5 percent in 2022) due to the current pace of economic reforms, resulting in regulatory barriers to growth. Additionally, the report.

Implemented by ANME and GIZ, the programme is co-financed by the Mitigation Action Facility and the Government of Tunisia, in close collaboration with Attijari Bank, as well as STEG. By providing financial incentives for middle-income households to install PV systems, the programme aims to increase.

In order to reach these targets, Tunisia has implemented a new regulatory framework through the enactment, in 2015, of Law n°2015-12 relative to electricity generation by renewable energy sources, which details three regulatory schemes: self-consumption, "authorizations" through call for projects.

Due to the combination of socioeconomic growth and subsidy policies, Tunisia has faced an increasing energy demand over the past 20 years. Electricity generation, primarily gas-powered generation, is dominated by fossil fuels. Thus, despite a steady increase in demand at of approximately 4%. Will Tunisia reach the 2020 intermediary targets?

With the aim of reaching the 2020 intermediary targets, the Tunisian Government published the 01/2016 Renewable Energy Generation Notice, fixing the installed capacity 2017-2020 targets by technology and regulatory scheme. The notice has set an installed capacity target of 1000 MW: 650 MW of Solar PV and 350 MW of Wind.

Are government's plans to reduce energy subsidies a step in the right direction?

Government's plans to reduce energy subsidies are a step in the right direction, and it is crucial to swiftly implement them and adopt complementary policies so as to ensure a sustainable recovery," stated Alexandre Arrobbio, World Bank's Country Manager for Tunisia.

Does Tunisia have a new regulatory framework?

In order to reach these targets, Tunisia has implemented a new regulatory framework through the enactment, in 2015, of Law n°2015-12 relative to electricity generation by renewable energy sources, which details three regulatory schemes: self-consumption, "authorizations" through call for projects, and "concessions" through call for tenders.
