The Ministry of Energy of Bulgaria prepared EUR 589 million in grants for standalone energy storage projects. The deadline for applications is November 21. With the surge in photovoltaic capacity, ambitious plans for renewables overall and a collapse in the coal power segment, Bulgaria needs urgent grid upgrades alongside energy storage.

Does Bulgaria have a solar rebate scheme?

The Bulgarian Ministry of Energy has launched a solar rebate scheme to the tune of BGN 240 million to help households reduce their carbon footprint and put downward pressure on their electricity bills.

When will energy storage systems be installed in Bulgaria?

The selected energy storage facilities must be put into operation by the end of March 2026. Authorities will check the status of every project in May 2025, the announcement reads. Bulgaria already held the first two tenders for battery energy storage systems (BESS) that would be integrated with renewable electricity plants.

How much solar power will Bulgaria have in 2022?

According to SolarPower Europe (SPE), Bulgaria reached 1.5 GW of cumulative installed PV capacity at the end of 2022. "Bulgaria's solar target remains low as PV will only account for 2.6% of electricity in 2040," SPE said in its 2022-26 EU solar market outlook.

How much money will be distributed from Bulgaria's National Recovery & Resilience Plan?

Following the final approval from the European Commission, a total of BGN 140 million will be distributed from Bulgaria's National Recovery and Resilience Plan, with the remaining sum coming from additional state and private sector funding. As much as BGN 80 million will be distributed in the first funding round.

Why is the Ministry of energy launching a call for standalone energy storage units?

The Ministry of Energy acknowledged that it is issuing the public call for standalone energy storage units after a long delay. The main objective of the investment is to facilitate a significant increase in the share of wind and solar power in the energy mix and to guarantee the security and stability of the national electricity system.
