

# **Government subsidy for solar power storage box in Croatia**

## Overview

---

The fund co-finances facilities installed and commissioned from January 1, 2025, and citizens can receive up to 50% of the eligible costs, or up to EUR 600 per kW of installed power capacity.

The fund co-finances facilities installed and commissioned from January 1, 2025, and citizens can receive up to 50% of the eligible costs, or up to EUR 600 per kW of installed power capacity.

Croatia is set to launch a groundbreaking program offering subsidies that cover up to 50% of the costs for residential solar installations. This comprehensive initiative encompasses solar panels, battery storage, and electric vehicle (EV) chargers, aiming to alleviate financial barriers for.

In line with the EU regulations on state subsidies, the European Commission approved the Croatian subsidy programme for the production of electric power from renewable energy sources in the amount of 783 million EUR. The measure will help Croatia to attain its goals related to energy from renewable.

The Croatian government has allocated €60 million (\$65.6 million) in subsidies for businesses to install 80 MW of renewables and 20 MWh of batteries. Croatia may only install 2.5 MW of PV in 2022. Image: Ministry of Regional Development of Croatia The Croatian government is providing €60 million.

The Croatian government plans to disburse EUR 651.8 million (USD 675.1m) in grants to support green transition projects in 2025, including renewables and energy storage. Rooftop solar array. Featured Image: Ralf Gosch/Shutterstock.com The Balkan country's Ministry of Environmental Protection and.

The Ministry of Economy has officially announced the "State Support Program for Facilities for Storing Self-Produced Electricity for the Purpose of Deferred Energy Delivery to the Grid". This program represents a significant opportunity for companies looking to invest in modern energy storage.

Given the growing importance of sustainable energy sources, many institutions at the national, county, and municipal levels offer various incentives for the installation of solar power plants and other photovoltaic equipment. These incentives can significantly reduce the costs of your energy.
