

Government subsidy for solar power storage box in Israel

Overview

The government will also offer a subsidy of NIS 5,000 (\$1,350) for the purchase of a battery for storing solar power. This will allow homeowners to store excess solar power generated during the day for use at night or during power outages. How many residential buildings in Israel have gone solar?

Only a handful of residential buildings in Israel have gone solar due to multiple obstacles, one of which is that a residents' committee cannot secure a bank loan. An apartment building fitted with solar panels (but not storage) in the southern city of Beersheba, through the Sun for All initiative. (Yuval Pan).

What will the government do about solar energy?

The press conference heard that the ministry will launch an extensive public awareness-raising campaign, a new, user-friendly internet site, school programs about the importance of renewable energy, and an increase in solar implementation centers in local authorities to help guide residents through solar installation.

Could putting solar panels on a home save a lot of CO₂?

(Shlomi Amsalem/Government press office) Ron Eifer, in charge of sustainable energy at the ministry, said putting panels on the roof of a private home could save 12 tons of carbon dioxide emissions annually. Equivalent to the amount of CO₂ absorbed by 600 trees, this could offset three to four roundtrip flights to New York yearly.

Could a solar roof save a lot of carbon dioxide?

Energy Minister Eli Cohen announces the 100,000 solar roofs campaign at a press conference in Jerusalem, February 18, 2025. (Shlomi Amsalem/Government press office) Ron Eifer, in charge of sustainable energy at the ministry, said putting panels on the roof of a private home could save 12 tons of carbon dioxide emissions annually.
