

Government subsidy for solar power storage box in Italy

Overview

In early 2025, Minister Adolfo Urso greenlit a €3.2 billion subsidy package, with 30% earmarked for storage—a move that's turbocharged SME investments [2] [3]. Here's the kicker: the government isn't just throwing money at the problem.

In early 2025, Minister Adolfo Urso greenlit a €3.2 billion subsidy package, with 30% earmarked for storage—a move that's turbocharged SME investments [2] [3]. Here's the kicker: the government isn't just throwing money at the problem.

This credit applies to eligible home upgrades (solar included) and can be recovered in installments across multiple tax years—or monetized immediately via invoice discounting. Homeowners could spend €18,000 and recover €19,800 in tax credits—flipping traditional ROI logic on its head. To address.

The Conto Termico 3.0 scheme is set to transform Italy's renewable energy landscape, particularly in the residential PV and Energy Storage sector. This long-anticipated update introduces a broader range of subsidies for households and businesses investing in solar, energy storage, EV charging, and.

In 2025, Italy continues to focus on solar energy as a key element for the energy transition. Thanks to a series of national and regional incentives, installing a photovoltaic system — with or without storage battery — has never been so advantageous. In this guide you will discover: 1. Tax.

Overseas media news on December 5, Italy's Minister of Enterprise and Manufacturing Adolfo Urso signed a new decree that will provide 320 million euros in energy subsidies to support small and medium-sized enterprises (SMEs) to invest on their own in the development and utilization of renewable.

The Italian government has signed a decree to allocate EUR 320 million (USD 336.3m) in state funding to small and medium-sized enterprises (SMEs) willing

to install self-consumption wind or solar power plants. Solar park in Italy. Image by: Iberdrola SA. The support will cover construction costs.

As part of the fiscal stimulus program “Decreto Rilancio” the Italian government introduced new tax incentives for residential solar and storage systems. The new Ecobonus will set the stage for a sustained growth of the residential PV segment in Italy. PV installations related to refurbishment.
