

Government subsidy for solar power storage box in Mexico

Overview

The government of Mexico requested a loan from the Inter-American Development Bank (IDB) to finance a program to develop energy storage systems. The program will benefit companies willing to invest in distributed generation (DG) solar projects paired with energy storage systems. Why is solar power a good investment in Mexico?

Our positive outlook is driven by favorable government policies and better economics for project developers. In addition, the solar irradiance levels and the continued focus on corporate sustainability will also continue to support strong demand for solar power in Mexico. Contact us today.

How effective is the solar bond program?

According to a cost-effectiveness study made by the ICM in 2018, the Solar Bond program has the potential to achieve a mitigation of 22.8 million tons CO₂ eq per year. By the end of Phase 1, it is expected to attain a reduction of oil consumption of 4.7 million barrels per year from avoided fossil fuel electricity production.

How will CFE use the solar bond scheme?

CFE will use the solar bond scheme to install PV systems in residential areas, providing users with enough electricity to meet their needs and sending excess electricity back to the grid. We expect this program to lead to lower costs for the user as well as lower subsidy costs for CFE.
