

Grid tied solar system kit

Overview

How does a solar grid-tie kit work?

A solar grid-tie kit, such as the 3000-Watt system, can be easily installed using patent (pending) technology. After installation, the system can be simply plugged into an existing electrical outlet. It generates 7000 KWH of electricity (average) per year for life and can save up to 70% of the electric bill by removing high tiered rated usage.

What is a DIY grid-tie solar panel kit?

Our DIY grid-tie solar panel kits contain the core components needed to power your property with solar. Our premium solar panels are backed by top-notch technical assistance from our team of solar specialists. IronRidge builds the strongest roof and ground mounting systems in solar.

What is the Expandable 1.8Kw Solar Grid-tie Kit?

The Expandable 1.8Kw Solar Grid-tie Kit is an innovative and affordable solar energy solution for homeowners who want to save money on energy bills and at the same time save the environment.

How does a grid-tie Solar System work?

A grid-tie solar system generates electricity from the sun and is connected to the house and main power grid. Solar PV grid-tie systems absorb photons of light from the sun, which produces DC current electricity. The solar inverter converts the DC current into AC current to produce electricity for your home.

What is a grid-tie solar power system?

Any extra solar electricity can be fed back to the utility grid for a credit towards your monthly electric usage. These complete grid-tie solar power systems include the highly efficient solar panels and inverters. Each system includes a rooftop rail mounting system for installation.

What is expandable solar hybrid (grid-tie/off-grid) kit?

The Expandable Solar Hybrid (Grid-tie/Off-Grid) Kit is an innovative and affordable solar energy solution for homeowners. It can save money on energy bills and help the environment. This system is expandable up to a 6KW Solar Power System to meet all household energy needs, leading towards a net-zero energy home.
