

Harbor freight solar charge controller

Overview

What is a solar charge controller?

The charge controller reduces overall system maintenance and prolongs the life of your battery. This solar charge controller or "charge regulator" is capable of handling a solar cell array voltage of 15-25 volts. Handles up to 30 amps of solar.

How many volts can a solar charge controller handle?

This solar charge controller or "charge regulator" is capable of handling a solar cell array voltage of 15-25 volts. Handles up to 30 amps of solar Prevents battery back-drain through panels at night.

How does a solar charge regulator work?

This solar charge regulator protects and regulates the charge of a 12 volt storage battery using solar panels. The solar charge regulator features three LED indicators (high voltage, low voltage, charging) and three connections for the solar panel (keyed two-pin connector), battery (keyed two-pin connector) and 12v output (3 in. pigtail).

How much does a solar charge regulator cost?

The regulator provides overcharge protection at 14 volts and discharge protection at 10.5 volts. Compare our price of \$14.99 to SCHUMACHER ELECTRIC at \$27.86 (model number: SPC7A). Save 39% by shopping at Harbor Freight. This solar charge regulator protects and regulates the charge of a 12 volt storage battery using solar panels.

Harbor freight solar charge controller

I have the harbor freight (thunderbolt) 100w solar kit with

You can use the panel on a different charge controller. It uses a different connector, I believe, but most controllers just have wires inserted directly into them. The renogy wonderer li will do ...

[Harbor Freight Tools 68751 Owner's Manual](#)

11. Install an appropriate charge controller/regulator to regulate output and prevent damage. Do not attach panel to battery or power grid without proper regulator, inverter, and/or charge controller. 12. Install and use according ...
